

Archie Roy

Archie Roy (1924-2012) was a Scottish astronomer who devoted most of his life to scientific discovery and psychical research. He was a president of the Society for Psychical Research (SPR) and the founder and president of the Scottish Society for Psychical Research (SSPR). His psi interests mainly centred on hauntings and mediumship.

Life and Career

Archie E. Roy was born on 24 June 1924 in Glasgow, the son of a draughtsman.^[1] He was educated at Hillhead High School and Glasgow University where he gained a BSc and a PhD. He taught science at Shawlands Academy before joining the university's astronomy department in 1958, becoming a professor in 1977. He later became a professor emeritus in astronomy at Glasgow University. He conducted research in astrodynamics, celestial mechanics and archeoastronomy. NASA profited from his understanding of orbital motion that enabled him to calculate trajectories for their lunar missions in the 1960s.

Roy was a fellow of the Royal Society of Edinburgh, the Royal Astronomical Society, and the British Interplanetary Society. He was also elected a member of the European Academy of Arts, Sciences and the Humanities. An asteroid discovered by American astronomer Edward Bowell was named after him in 1994.

His other activities included an interest in classical music and a high degree of competence on the piano. He published twenty books including six novels and textbooks on astronomy and psi research.

Psi Research

Roy's interest in psi research developed by chance after he found some books on the paranormal in the university library. He subsequently joined the SPR before founding the SSPR in 1987. He served as president of the SPR from 1989 to 1992 and continued giving evening classes for the SSPR well into his eighties, organized by his colleague Tricia Robertson at the University of Glasgow. He was awarded the SPR's Myers Medal in 2004.

Roy displayed a rigorous and scientific approach to his work, characterized by a genuine care for the people he worked with and a sense of humour (he often remarked that if he died and found he hadn't survived, he would be 'very surprised').^[2]

Hauntings

Roy was often called to investigate suspected hauntings in Scotland and was also involved in the investigation of mediums, often accompanied in both by his colleague Tricia Robertson. He was labelled by the media as 'the Glasgow Ghostbuster', a regular contributor on psychical topics to Scottish TV and radio.

Roy commented that his investigations often originated as a response to cries for help from people convinced that they or their homes were haunted. Some cases were found to be imaginative misinterpretations of unusual noises or mental disturbance, but some he considered to be genuinely paranormal poltergeist or apparitional cases, or both. He wrote:

In some we found evidence of intrusion from the other side of death, of 'unfinished business', of maliciousness, of a wish to dominate. In some we could identify the problem and even take measures to solve it, operating not so much as psychical researchers but more akin to psychical plumbers! Hopefully we learned from every case but our prime concern in each was to help the unhappy family who called us in.^[3]

Maxwell Park

Between 1974 and 1975, Roy and the Rev Max Magee investigated a poltergeist-type case occurring at a house in Balornock (referred to by the pseudonym Maxwell Park). Incidents of rapping noises and flying objects were witnessed by numerous people including local police officers and priests. The phenomena appeared to centre on two boys, aged eleven and fourteen. It dissipated after a service was held by Magee and one of the boys was sent to live with his grandparents.^[4]

Mediumship

Roy and Robertson were involved with the investigation of mediums as part of the SPR PRISM initiative in the mid-nineteen-nineties. In addition, over a period of five years they devised a protocol for testing the hypothesis that 'All mediums' statements are so general that they could apply to anyone',^[5] carrying out numerous tests with mediums and participants among the general public. They concluded that, in circumstances that precluded the operation of normal factors, people given readings accepted a significantly higher proportion of statements as being relevant to their lives than those that were not given readings.

Scole Circle

Roy attended a sitting of the [Scole mediumship group](#) during the 1990s. He later wrote that a 'control' communicator known as 'the scientist'

spoke to me, welcoming me and saying that he had carried out some of the pioneering work of calculating periodic orbits of planets and satellites. He discussed with me some of the technicalities and difficulties he had experienced and referred to the fact that in his day there were no computers such as I could now use. ... Afterwards I realized that there were only about a score of people in the UK who would have been able to have a conversation with me at that level of expertise on that subject. And as far as I know, the mediums had not been given my identity and profession. I also realized that the scientist bore quite a resemblance to George Darwin, related to Charles Darwin, who had indeed carried out such pioneering calculations on periodic orbits.^[6]

Cross-Correspondences

Roy's book [*The Eager Dead*](#) (2008) examined historical aspects of the 'cross-correspondence' investigation which took part in the early part of the twentieth century, concerning putative post-death communications conveyed through mediums often through allusions to classical Greek and Latin literature. In particular the book examined the previously unknown relationship between Gerald Balfour, one of the principal investigators, and Winifred Coombe-Tennant (the medium known as 'Mrs Willett'), and the significance attached to the birth of their love child.^[7]

Selected Works

Fiction

All Evil Shed Away (1970). Goring-by-Sea: World of Books.

The Curtained Sleep (1971). Cleveland: World Publishing Company.

The Dark Host (1976). London: J. Long.

Devil in the Darkness (1987). Burlington: Apogee Books.

Nonfiction

The Foundations of Astrodynamics (1965). New York: Macmillan.

Orbital motion (2008). San Diego: Bennet Books Limited.

A Sense of Something Strange, Investigations Into the Paranormal (1990). Glasgow: Dog & Bone.

Archives of the Mind (1996). Stansted: SNU Publications.

The Eager Dead (2008). Leicester: Book Guild Publishing.
